

DESTINATION RESEARCH (JDDHA) GUIDELINES

INSTRUCTIONS TO e-JOURNAL/JOURNAL CONTRIBUTORS

MISSION

The Journal of Destination Design and Hydroscape Architecture

The Official Quarterly of the Institute

The Journal of Destination Design and Hydroscape/Coastal Architecture (JDDHA) is a scholarly and professional, refereed publication of the Institute of Destination Architects and Designers (IDAD). Objectives of the journal are as approved by the current issues policies and by the submittal guidelines. Ongoing objectives for all issues are: To publish destination, hydroscape/coastal design architecture research and applied information for communication to educators and practitioners in the design disciplines, such as: architecture/land architecture, industrial design/interior architecture, art/theatrical arts, coastal sciences and technologies, including ecology and environmental science, whose work directly relates to destinations and waterscape development issues.

To promote the destinations profession and disciplines involved with hospitality, travel and tourism, design, art, scenography, waterscape-coastal developments and other design, research and management professions, as well as the travel and tourism industry's executive or corporate assessment needs, dealing with design/management research for resort, theme park, exotic destination and travel concerns/issues, JDDHA solicits member and non-member manuscripts and papers/essays from practitioners, educators and students in all related disciplines.

[JDDHA] JOURNAL EDITORIAL POLICY

Manuscripts for submission to the Journal of Destination Design and Hydroscape Architecture should be double spaced using the following order of sequence: title page, credit page, abstract, keywords, text, references, tables, drawings, legends, and figures.

Title page: Title, author's name and title, affiliation, mailing address, and a condensed running head of no more than 60 letters and spaces.

Abstract: A concise, informative results-type abstract of no more than 5% of article's total length.

Keywords: List beneath abstract, keywords related to methods of results.

Text: Acknowledgments are best included in introduction or between conclusion and references. Figures and tables should be referred to, in order, in the text.

References: Alphabetically, by author and year of publication; for three or more authors, use first author and others.

Footnotes: Avoid use where possible. Number those that are necessary consecutively and include on separate page to follow references.

Equations: Number those to be set off from text.

Tables and Figures: Should not exceed 50% of article's total length, keeping proportions of web page in mind.
